Data Modelling with Azure by Gaurisha Srivastava
(14th February 2023)

In another installment of the tech-talk series held by The Arc, the Data Science society of IGDTUW, "Data Modelling with Azure" was held on the 14th of February in the Conference Room and was hosted by fellow IGDTUW senior and incoming Microsoft SWE Gaurisha Srivastava. The session was incredibly informative with Gaurisha helping students perform tasks in Data Modelling using Azure and setting up ML pipelines to build models that students may use on a day to day basis. Gaurisha also talked about her experience as an intern at Microsoft and her time at IGDTUW, thus making the talk a wholesome and informative experience for all attendees.
