

Project Exhibition by Department of ECE on 23rd May, 2019

On 23rd May, 2019, Department of ECE jointly with Anveshan Foundation & IEEE IGDTUW, organized a Project Exhibition event at Anveshan Foundation block, IGDTUW. The aim of the event was to give a platform to students where they can present their research and innovative ideas in various technical fields. In the event, students from Dept. of ECE showcased their projects in the areas like VLSI, Electronics, Communication, Robotics, Embedded Systems, IoT, Image Processing, Biomedical, Machine learning and Control & automation to name a few. Students had shown the working models of their projects. These students, in their 7th & 8th semester, were mentored by the ECE faculty members. The projects were designed and developed, keeping in mind, to give creative solutions to societal problems using technology.

Around fifty students from Dept. of ECE participated. The guest of honour, Mr. Reetesh, Director (Technology), Altran (formerly Aricent) graced the occasion with his presence. He has more than 21 years of experience in area of technology. The guest assessed the projects made by the students. He shared his valuable suggestions and appreciated the work done by the students. He was quite impressed by seeing students exploring dimensions ranging from alternate means of communication (Wireless Optical communication - FSO) to realizing everyday use cases by leveraging the strengths of IoT and ML (fire detection and extinguishing, home automation, security and surveillance, assisted living for mutes, elderly, visually impaired people, machines learning projects for breast cancer detection, marine species detection).

The event saw an enthusiastic response from students and it was a great success.
