Gender Sensitization is basic requirement for the normal development of an individual. Without being sensitive to the needs of a particular gender, an individual may refrain from understanding the opposite gender and in some acute cases, even him or herself. The need for this sensitivity has been felt and realized through times immemorial and in almost all kinds of human existence, across the globe. But somehow in the recent times, a much stronger need is felt and realized to talk and discuss about this sensitive topic both on a Personal and Professional front.
